Enabling the Health Continuum with Informatics

Jeroen Tas

Healthcare Informatics. Solutions. Services

The changing global healthcare landscape requires a fundamentally different informatics approach

- Enabling population health management, including Healthy Living and Prevention
- Patient centric solutions, with built-in collaboration models across the health continuum
- Integrating data from disparate point solutions across hospitals, physician practices, insurance, consumer homes
- Providing actionable and context sensitive information to consumers, care givers and clinicians

The Philips **Health**Suite Digital Platform is designed to support the Health Continuum

Multiple devices / applications contribute to a rich data set

Secure, scalable and adaptable

3rd party applications and devices

Philips applications and devices

User experiences (Consumer, Care team, Clinical, Administrative UX)

Professional healthcare functionality (API)

(HL7, DICOM, Image processing, HIPA, healthcare data etc.)

Consumer health functionality (API)

(Analytics, visualization, community)

Collaboration cloud

- Patient relationship management.
- Collaboration & social integration.
- Metering & billing.
- Master patient index.
- Workflow support.

Device cloud

- Discovery & registration.
- Provisioning.
- Diagnostics.
- Configuration management.
- Security.

Data cloud

- Identity & entitlements.
- Orchestration.
- Interoperability Engine.
- Data, image & video services.
- Analytics and machine learning.

Care coordination and remote patient monitoring for improved outcomes

Applications on the HealthSuite Digital Platform...

...enabling programs to achieve relevant financial and clinical improvements¹

eCareCoordinator for clinicians

- Population health management and care coordination
- Remotely monitor patients' vital signs and health status
- Monitors hundreds of patients simultaneously and prioritizes need of care through data analytics

eCareCompanion for patients

- Enables real-time communication with care team
- Health coach to patients with chronic conditions like heart disease, diabetes, COPD, cancer

² Emergency Department

Advanced clinical decision support based on holistic patient view

Innovation programs with leading institutes...

 Innovation programs underway at MD Anderson (radiology) and University of Chicago

THE UNIVERSITY OF TEXAS

Radiology, Oncology

...to improve diagnosis / treatment of acute conditions (e.g. cancer)

- Information integrated from multiple patient studies
- Presents treatment progress on multiple tumors over time
- Context sensitive information gives the physician concise patient status at the point of diagnosis

Healthcare Informatics, Solutions and Services: enabling the Health Continuum

Enabling the Health Continuum with informatics

- New solutions for population health and support of the Health Continuum, grounded in big data, social and mobile technologies
- Beyond the EMR: the cloud based HealthSuite
 Digital Platform is the foundation for all
 connected health devices and informatics
 products
- It is the foundation for an open ecosystem that will drive rapid innovation to deal with the challenges along the Health Continuum
- Engage with a new ecosystem so together we can create the future of healthcare
