TOGETAR

TOGETAR Fear of flying App

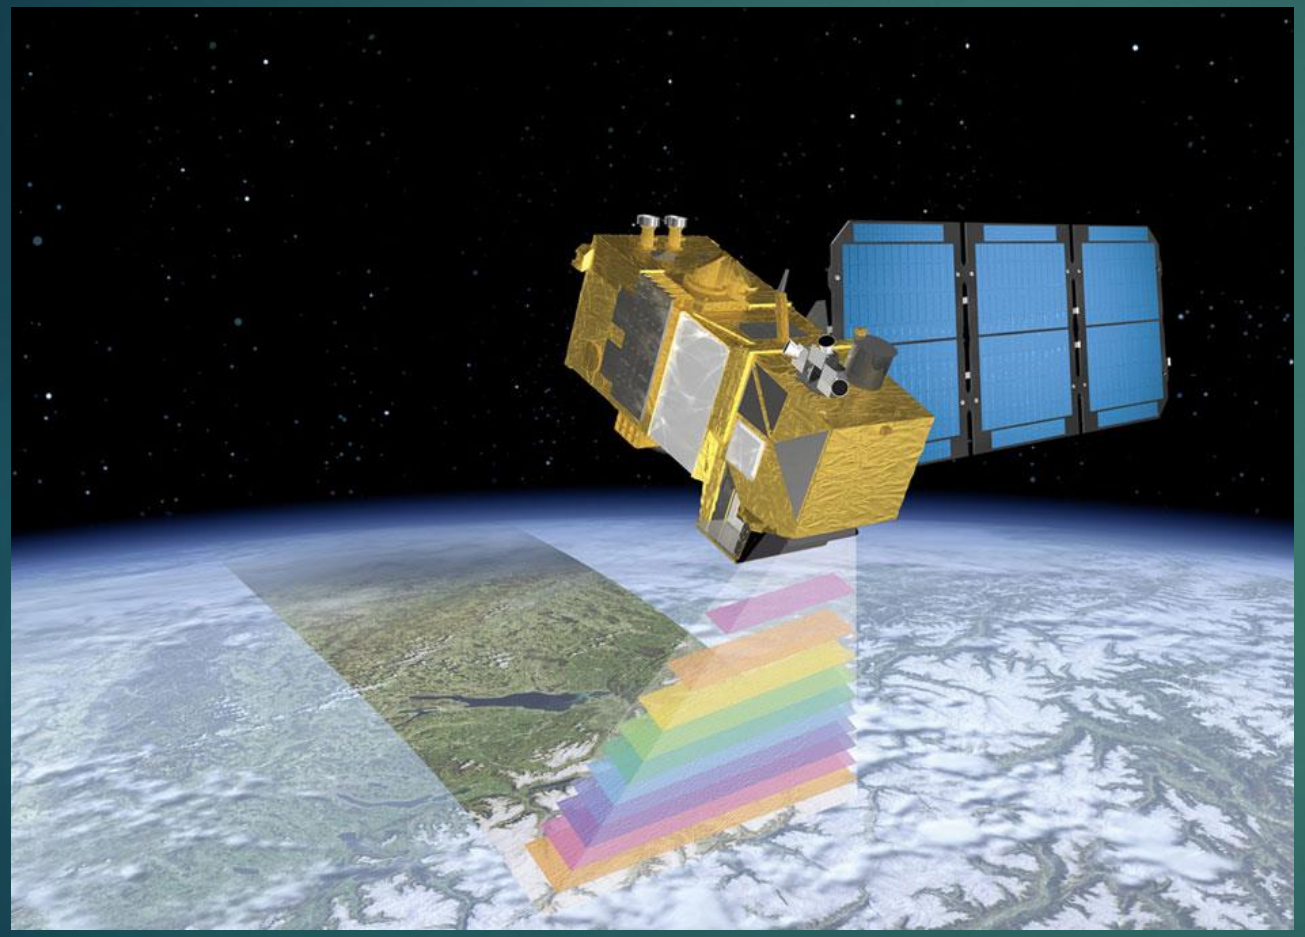
- Designed to provide comfort to passengers who have a fear of flying.
- Inform users about flight safety statistics, weather forecasts, and turbulence. VALK also provides a unique “panic button” which, when pressed, immediately provides exercises to reduce the user’s stress levels.
- VALK is a collaborative effort on the part of Schiphol Airport in Amsterdam, KLM Airlines, MartinAir, ArkeFly, and Transavia.com, as well as researchers from the University of Leiden.

TOGETAR

- Users of the Amber Alert App instantly receive a push message when an AMBER Alert is issued. That happens when the police fears that the life of a missing or abducted child is in danger.

- In addition, parents can store information about their children, such as a photograph and appearance. This information can be immediately processed by the police when a child is accidentally missing.

TOGETAR SATcontrol



- SATcontrol is a platform for developing applications by which it is possible to unlock satellite data for monitoring and control functions.
- TOGETAR delivers a state of the art artificial intelligence software solution to monitor the movement of dikes in The Netherlands.
